# Home task survey development

Describe the content of the proposed activity.

After the first visit, a questionnaire is developed. The questionnaire must be developed together on the Zoom platform, translated into native languages and given to the teachers, and parents of students of their school to fill out.

This questionnaire includes questions about:

- \* The importance of inclusive education in school;
- \* How these three different groups see inclusion and opportunities for pupils with SEN at school;
- \* What kind of skills and knowledge pupils with SEN and their teachers should have to ensure a safe and meaningful transition process?

Describe the target group for this activity. Who is going to take part and who is going to benefit from the results?

The teachers and administration members from all participating organizations will take part in it.

Explain how is this activity going to help to reach the project objectives.

The preparation of the survey where all participating countries work together will make all the persons involved to think about the key questions

Describe the expected results of the activity.

The expected outcome is a completed and translated survey which can be run in all participating countries.

Please describe how you determined the grant amount attributed to this activity.

All together 4 homeworks are planned during the project duration. All of them will be done remotely in each participating school and together in Zoom platform. It means that we need to buy Zoom Pro version which cost 140 eiro for one year. In our case we will buy it for 2 years which will cost 280 eiro all together. To cover those expenses we divided 280 eiro in all 4 planned remote meetings. ( $280:4=70$  eiro).
