Explain how is this activity going to help to reach the project objectives.

At the time of the application process, Italian partners said that they would like to help all other schools to understand how to use social and local media successfully to raise awareness on important topics. So we do think that the teachers and administration team from Don Roberto Angeli will show us how to work more effectively to raise awareness of the project topic to the wider public.

Also, we will share good and bad practice examples from which we can learn new methods to implement in our daily work and put them in our suggestions document.
